[ebuka-portfolio-mauve.vercel.app](#)

Self-taught AI automation engineer with 92 production n8n workflows — spanning multi-agent AI systems, sales pipelines, fintech automation, content factories, and conversational agents. Built alone, no team, no formal training programme. I replace manual processes with reliable systems that run without hand-holding.

CORE SKILLS

Workflow & Automation	AI & Agent Systems	Integrations & Platforms
- n8n (97+ production workflows, self-hosted) - Zapier - Webhook architecture & API orchestration - Error handling, retries, conditional routing	- Multi-agent pipelines & orchestration - Persistent memory agents (Mem0) - RAG pipelines (Pinecone) - Prompt engineering — Claude, GPT, OpenRouter	- Airtable · Notion · Google Workspace - Supabase · PostgreSQL · Pinecone - Telegram · WhatsApp Business · Slack - Solana RPC · LI.FI · ElevenLabs · YouTube API

EXPERIENCE

AI Automation Engineer · Independent · Client Projects	2024 – Present
- Built and deployed 92 production n8n workflows independently — no team, no formal training programme, self-directed. 3-workflow client system covering AI lead scoring & CRM routing (13 nodes), reply-aware 7-day follow-up sequences (21 nodes), and AI proposal generation with auto-populated Google Docs (12 nodes). Live in production. — APEX Sales Automation Suite 78-node AI support system with persistent memory (Mem0), intent routing, and seamless human escalation. Deployed live on Telegram and WhatsApp simultaneously. — Aurelius Customer Support Agent v2 57-node AI content pipeline generating and publishing across 6+ platforms with zero manual intervention after trigger. — Multi-Platform Social Media Factory 24-node autonomous DeFi agent monitoring positions and executing cross-chain transactions via Solana RPC, Jupiter Aggregator, and LI.FI Protocol. — LI.FI Autonomous Capital Manager - Connected 20+ APIs in production including ElevenLabs, WhatsApp Business, Telegram, Reddit, Solana RPC, Supabase, Pinecone, and Google Workspace.	

SELECTED WORKFLOW PORTFOLIO

Aurelius Support Agent v2 (78 nodes) · APEX Sales Suite (46 nodes, 3 workflows) · Social Media Factory (57 nodes) AI Viral Video Generator (40 nodes) · Smart Onboarding Agent (32 nodes) · LI.FI Capital Manager (24 nodes) · Full portfolio: ebuka-portfolio-mauve.vercel.app

EDUCATION

BSc Actuarial Science · University of Lagos	2024
Strong quantitative and analytical foundations — applied directly to automation system design, data pipeline logic, and AI agent decision architecture.
